WALL PANELS

Silver Fir

Rift/Quarter-Sawn Optics

Solid Silver fir wood wall panels in rift and quarter-sawn optics provide an appealing and modern solution for wall design. The rift optics refer to the cutting process where the wood is cut along the grain, resulting in a very uniform grain pattern that is characterized by a clear and straight-lined look. The effect of the rift optics is very clean and noble. The uniform grain creates a very calm and restrained atmosphere that is ideal for modern interiors. Thanks to the clear lines, the panels become a real eye-catcher and add elegant accents to any room.

Surface „Rift and quarter-sawn“ | Silver fir wall panels | Solid wood

Thickness x Width	20 x 130 mm
Length	2.30 m
Double end profile	Yes
Quality	No knots or small knots; occasional cracks or knotholes
Wood moisture	KD 12% +/- 2
Weight	460 kg/m ³
Surface treatment	planed smooth, Optionally with factory lye, oil or soap treatment.
Planing	Visible side
Application	Interior
